Iván Pérez Neri is a Biological Pharmaceutical Chemist and PhD from the National Autonomous University of Mexico (UNAM). He is a Researcher in Medical Sciences at the Neurochemistry Department of the National Institute of Neurology and Neurosurgery Manuel Velasco Suárez, and a member of the National System of Researchers (Level I).

He has 68 scientific publications (37 of them with an impact factor). He is Editor of scientific journals such as *Annals of Medicine*, *International Journal of Neuroscience*, and *Archivos de Neurociencias*. He has presented his research papers at more than 30 national and international conferences.

He has directed academic thesis of Medical Specialties and Master of Science in institutions such as the UNAM and the National Polytechnic Institute. His studies have been awarded twice at the National Meeting of Researchers of the Secretariat of Health. He has published chapters in scientific books, as well as a book derived from his doctoral thesis.

He is also a member of academic groups such as the Society for Neuroscience and the Cochrane Collaboration. He currently coordinates a research group in evidence synthesis on psychiatric and neurological disorders comprised of researchers from several countries in America, Europe, Asia, and Oceania.

He has participated in interviews with national media about various lines of research and has a science communication project
