Authors contributions

I.P.N. contributed with manuscript conception, design, drafting, preparation, and submission for publication.

Keywords

neurochemistry, evidence synthesis, clinical research, basic research.

Iván Pérez Neri holds a degree in Biological Pharmaceutical Chemist and a PhD from the National Autonomous University of Mexico (UNAM). He is a Researcher in Medical Sciences at the Neurochemistry Department of the Manuel Velasco Suárez National Institute of Neurology and Neurosurgery, and a member of the National System of Researchers (Level I).

His academic profile includes 68 scientific publications, 37 of which with impact factor. He has presented his research papers at over 30 national and international conferences. He currently serves as an Editor for scientific journals such as *Annals of Medicine*, *International Journal of Neuroscience*, and *Archivos de Neurociencias*.

Dr. Pérez Neri has supervised thesis in Medical Specialties and Master of Science programs at institutions like UNAM and the National Polytechnic Institute. His research work has been acknowledged in two occasions at the National Meeting of Researchers organized by the Secretariat of Health. Additionally, he has published chapters in scientific books, along with a book based on his doctoral thesis.

He is also a member of academic groups such as the Society for Neuroscience and the Cochrane Collaboration. At present, he leads a research group focused on evidence synthesis in psychiatric and neurological disorders, comprising researchers from various countries in America, Europe, Asia, and Oceania.

Dr. Pérez Neri has participated in interviews with national media about various lines of research, and has a science communication project called “Difundiendo conciencias”, accessible through platforms like YouTube and the Open Science Framework.
